## The Challenge

In response to the many recent medical technology advancements and a growing demand for healthcare services in the region, GLMC was faced with the need to quickly expand and upgrade.

## The Solution

GLMC officials in partnership with the City, County, and a local architectural firm, designed and implemented a renovation project that added several new wings and expanded existing departments. The changes included an additional 52,190 sq ft to the existing hospital, a new multi-purpose treatment/procedure room with urodynamics, a pain clinic procedure room with a new state-of-the-art flouro-bed, a new GE Light Speed VCT XT scanner, and a new Hyperbaric Medicine Wound Care Center.

## The Results

In addition to job creation due to the expansion, GLMC stands ready to meet the growing demands of residents in the greater Grenada area.
